Commissions, management fees and expenses may all be associated with investments in ETFs. Investors should carefully consider an ETF's investment objectives and strategies, risks, fees and expenses before investing. The prospectus and ETF facts contain this and other information. Please read the prospectus and ETF facts carefully before investing. ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETF's net asset value. Brokerage commissions and ETF expenses will reduce returns. Performance of an ETF may vary significantly from the performance of an index, as a result of transaction costs, expenses and other factors. The indicated rates of return are the historical annual compounded total returns including changes in share or unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.
